**ROSEN LOUIK & PERRY, P.C.**  
PITTSBURGH

## Personal Injury Lawyers for Serious Auto Accidents

The lawyers at Rosen Louik & Perry have decades of experience holding large trucking companies, corporations and insurance companies responsible for the damages and injuries caused by negligent drivers. Our lawyers develop and present the full extent of those injuries and damages and have obtained record-setting verdicts and settlements in vehicle related cases.

## Commercial Trucking

Cases involving commercial vehicles and tractor trailers tend to be the most vigorously defended. In a perfect world, companies that make their livelihood via the roadway would immediately and fairly compensate individuals that they injure during their business endeavors. Exactly the opposite. Driven by profits and the desire to keep their insurance premiums down, commercial trucking companies go to great extremes to under-compensate and even avoid paying victims. Our legal team will take swift action to preserve evidence and your rights.

## Drunk Driving Accidents

Drunk driving accidents are more likely to cause major injury or fatality. Our firm is equipped for the most serious injuries, such as spinal cord damage, brain trauma and of course wrongful death. Our attorneys will look at the liability of the drunk driver as well as a business or individual who enabled a visibly intoxicated person. Insurance companies are eager to settle drunk driver claims, but not necessarily for a fair amount. Be sure to talk to an attorney and not just an insurance company.

## Time is of the Essence

Evidence disappears. Witnesses forget. Deadlines expire. Call without delay to start the investigation. We represent victims and families of Allegheny County and surrounding Pennsylvania. We will make the case for full compensation, identify all elements of damages and identify all sources of liability.
